

MODELING LANGUAGE ON A COMMUNICATION BOARD

Quick Guide

Find an activity that gets your child engaged and motivated.
It could be a puzzle, a book, bricks, a ball run, bubbles...

See what your child is doing and find the word on the core board.

Point to the corresponding symbol and say the word.

Stop and wait. Give time for information to be processed and time for your child to respond.

If your child continues to play don't demand language, simply show and say again and then continue playing.

Don't forget

..to use the communication board yourself when you playing with your child.

..to see every situation as an opportunity. If your child is reaching for something show and say "want" or if they are sad show and say "bad" or "not + like".
